

REVIEW

of the Work program (WP) for the Discipline "Physical education" for Full-Time Students in the "General Medicine" Specialty

The WP for the "Physical education" discipline has been developed in accordance with the requirements of the State Educational Standards of the Kyrgyz Republic, based on the core educational program for the specialty "General Medicine".

The WP includes: the objectives of the discipline, learning outcomes, and competencies formed during the course; the place of the discipline within the structure of the core educational program; a competency map of the discipline by topic; a technological map of the discipline; a points accumulation chart for the discipline; a thematic plan distributing hours by activity type; the discipline program; learning objectives and outcomes for each topic (section); a calendar-thematic plan by activity type with an indication of the competencies formed, hours, points, methods, assessment tools, literature, educational technology, educational-methodological resources, and point assignment policy.

Based on the above, I believe that the reviewed program fully meets the established requirements and can be recommended for the education of students in the specialty "General Medicine".
